

**NEXT
LEVEL**²⁰¹⁰

► **Is procurement a strategic
function in your organization?
It can be.**

Discover how to take procurement to the NextLevel

NextLevel 2010 Conference
Raleigh Convention Center
January 31 - February 3, 2010

When, not if.

NextLevel is the annual event for procurement professionals to discuss, explore and experience the latest thinking, newest strategies and most innovative solutions in procurement. The conference is designed to help you overcome procurement challenges of today, and provide you with ideas, contacts and resources to fast forward your organization's procurement to the leading edge tomorrow.

► "I cannot emphasize enough how great a conference NextLevel is for procurement professionals."

- Shawnee State University

NextLevel is the conference for procurement professionals who...

Want to maximize the value of their ERP system.

You will meet many practitioners that have integrated a variety of ERP systems with SciQuest. The conference is a small investment to elevate your procurement function and its contribution to your company's bottom line.

Know they can benefit from eprocurement, but don't have a budget. You'll learn about tools and strategies that will help you calculate and communicate the financial value of an eprocurement solution. And, network with peers that have implemented SciQuest to make procurement a strategic function despite budget limitations.

Desire a procurement solution that may deliver a positive and significant ROI in a matter of months. You'll hear from organizations in your industry that have experienced a fast ROI on their investment and network with peers that can speak directly to the value of an eprocurement solution including cost savings and process automation.

Want to understand how on-contract spend is critical to spend analysis. You will learn that spend analysis and on-contract spend are two sides of the same coin – and network with peers that have been able to address both.

Require a tailored eprocurement solution that grows as your business grows. You'll meet many organizations large and small with the same challenges – and learn how they have leveraged eprocurement to deliver significant efficiencies and cost savings.

FAST FORWARD

Advance to the leading edge of procurement at NextLevel — www.sciquest.com/nl2010/

A vision for procurement-proving the concept

- NextLevel 2010 will feature an analyst roundtable discussion, including Aberdeen Group, AMR Research and Gartner.
- Author of many best-selling books, Steven Little is a sought after expert on the subject of business growth and the future of opportunity. In this humorous, yet insightful presentation, Steven will show you how to identify and overcome the stifling behaviors inherent in any organization and how you can lead the way toward substantive change and real growth!

► “The NextLevel conference provides both buyers and suppliers with valuable information about the need for spend management.”
